

Summery

Senior Software Engineer / Platform Engineer with 8+ years of experience designing scalable backend systems, AI-enabled platforms, and distributed architectures for high-demand products. Proven track record delivering production systems for Silicon Valley startups and UK-based ventures. Strong background in Python, Node.js, distributed systems, Kafka, Docker/Kubernetes, and applied machine learning. Experienced in embedded systems (C/C++, STM32, ARM) and building reliable, performance-critical software. Seeking relocation-supported roles in backend, platform, AI, or embedded engineering.

Work Experiences

Senior Software Engineer at Pangian | San Francisco, USA

Aug 2023 — Feb 2026

Remote community | Worldwide (Silicon Valley)

- **System Architecture:** Designing scalable and efficient system architectures for high-demand platforms.
- **AI Solutions:** Designing and enhancing architecture and APIs, integrating NLP and LLM-based solutions.
- **DevOps:** Streamlining development with CI/CD, Docker, Kubernetes, and automated deployment pipelines.

Software Engineer / CTO at Enviroble | London, UK

Mar 2022 — Apr 2023

Environmental Social Platform (Supported by University College London, BaseKX)

- **Data Science:** Applied statistical methods and ML to extract insights from complex datasets.
- **Web Development:** Built responsive and scalable applications with strong usability.
- **System Architecture:** Designed robust architectures tailored to project needs.

Software Engineer / Founder at Tradeoption | Mashhad, Iran

Jan 2020 — Feb 2022

Algorithmic Trading Platform for Stock Options Contracts

- **Algorithm Design:** Developed optimized trading algorithms for real-world financial problems.
- **Web Development:** Built efficient front-end and back-end systems.
- **Data Science:** Applied predictive models and analytics to guide trading decisions.

Software Developer / Co-Founder at Class724 | Birjand, Iran

May 2015 — Nov 2019

Learning Management System (LMS) — Science & Technology Park of South Khorasan

- **Web Development:** Built scalable interactive learning systems.
- **System Design:** Designed reliable and maintainable architectures.
- **DevOps:** Automated workflows using Docker, Jenkins, and Kubernetes

Skills

Technical Skills

- Machine Learning
- Software Engineering
- DevOps
- System Design
- Microsoft Certified IT Professional

Programming Languages & Frameworks

- Python
- PHP (full stack WordPress)
- JavaScript
- Java
- C++
- C
- JavaScript
- Node.js
- React
- Django
- Angular
- TypeScript
- MQL
- Next.js
- Flask
- E2E Testing (Playwright, Automated QA in CI/CD)

Databases & Tools

- MySQL
- Redis
- MongoDB
- PostgreSQL
- SQLite
- Elasticsearch
- Apache
- Kafka
- Linux
- Docker
- Nginx
- QiSkIt
- TensorFlow
- Cirq

Embedded Systems & Microcontroller

Microprocessor & Assembly Programming (EMU8086, AVR)

- Microprocessor structure and components
- 8086 & Pentium architecture

ARM Microcontroller Training with Keil (LPC1768)

- ARM microcontroller families
- LPC1768 initialization
- Assembly programming with EMU8086
- 8086 CPU design
- USART registers in AVR microcontrollers
- GPIO, NVIC, ADC, Timer, PWM, DAC, USART, RTC modules

Education

Master of Information Technology Engineering

2017 — 2019

Islamic Azad University, Birjand Branch

Thesis: Bitcoin price prediction using Bayesian Neural Networks

Bachelor of Industrial Engineering

2009 — 2014

Payam Noor University, Birjand Branch

English Score

TOEFL (94): Speaking 23 | Listening 28 | Writing 22 | Reading 21

Research & Publications

- **An Introduction to Quantum Computing: Advantages and Challenges** (2021) — Distributed Computing & Big Data Conference
- **Comparison of LG Trader and EMA for Stock Selection** (2019)
- **Predicting Bitcoin Price Using Bayesian Neural Networks** (2019, English version)
- **Secure & Trustworthy Data Management Framework for Explainable ML Pipelines** — *In Progress*

Research Interests

Software Engineering | Machine Learning | Data Science | Artificial Intelligence | Embedded Systems
